

110TH CONGRESS  
2D SESSION

# S. 2606

## AN ACT

To reauthorize the United States Fire Administration, and  
for other purposes.

1       *Be it enacted by the Senate and House of Representa-*  
2   *tives of the United States of America in Congress assembled,*

1 **SECTION 1. SHORT TITLE.**

2 This subtitle may be cited as the “United States Fire  
3 Administration Reauthorization Act of 2008”.

4 **SEC. 2. FINDINGS.**

5 Congress makes the following findings:

6 (1) The number of lives lost each year because  
7 of fire has dropped significantly over the last 25  
8 years in the United States. However, the United  
9 States still has one of the highest fire death rates  
10 in the industrialized world. In 2006, the National  
11 Fire Protection Association reported 3,245 civilian  
12 fire deaths, 16,400 civilian fire injuries, and  
13 \$11,307,000,000 in direct losses due to fire.

14 (2) Every year, more than 100 firefighters die  
15 in the line of duty. The United States Fire Adminis-  
16 tration should continue its leadership to help local  
17 fire agencies dramatically reduce these fatalities.

18 (3) The Federal Government should continue to  
19 work with State and local governments and the fire  
20 service community to further the promotion of na-  
21 tional voluntary consensus standards that increase  
22 firefighter safety.

23 (4) The United States Fire Administration pro-  
24 vides crucial support to the 30,300 fire departments  
25 of the United States through training, emergency in-  
26 cident data collection, fire awareness and education,

1 and support of research and development activities  
2 for fire prevention, control, and suppression tech-  
3 nologies.

4 (5) The collection of data on fire and other  
5 emergency incidents is a vital tool both for policy  
6 makers and emergency responders to identify and  
7 develop responses to emerging hazards. Improving  
8 the data collection capabilities of the United States  
9 Fire Administration is essential for accurately track-  
10 ing and responding to the magnitude and nature of  
11 the fire problems of the United States.

12 (6) The research and development performed by  
13 the National Institute of Standards and Technology,  
14 the United States Fire Administration, other govern-  
15 ment agencies, and nongovernmental organizations  
16 on fire technologies, techniques, and tools advance  
17 the capabilities of the fire service of the United  
18 States to suppress and prevent fires.

19 (7) Because of the essential role of the United  
20 States Fire Administration and the fire service com-  
21 munity in preparing for and responding to national  
22 and man-made disasters, the United States Fire Ad-  
23 ministration should have a prominent place within  
24 the Federal Emergency Management Agency and  
25 the Department of Homeland Security.

1 **SEC. 3. AUTHORIZATION OF APPROPRIATIONS FOR UNITED**

3 Section 17(g)(1) of the Federal Fire Prevention and
